Our Vision and Core Values

- Vision

- ✓ To be a renowned leader in delivering upstream and downstream oil and gas engineering solutions to the European and African Oil and Gas Industry. This will be achieved by providing technically compliant and cost effective solutions to existing and prospective clients
- ✓ We are committed to delivering smart, clean and reliable solutions with key focus on environment preservation

- Core Values

- ✓ Safety first, Innovation, Cost Efficiency, Collaboration and Integrity

Primary Activities

- ✓ Ship Management
- ✓ Certified Fluid Sampling
- ✓ Crew Management and Manpower Solutions
- ✓ Maritime Training
- ✓ Subsea Engineering Training
- ✓ Ship Procurement and Project Management
- ✓ Vessel Survey and Inspection
- ✓ Subsea Survey and Inspection
- ✓ Remote Operated Vehicle Operations
- ✓ Diver Manpower Supply, Intervention and Management
- ✓ Supply of Offshore Support Vessels and Offshore Tankers
- ✓ Safety Equipment Services and Repairs

Ship Management

- ✓ Pre Vetting/SIRE Inspection
- ✓ Internal ISM and ISPS Audits
- ✓ Independent Condition Survey
- ✓ Periodic inspection on behalf of clients/banks
- ✓ Technical analysis & Vessels health check
- ✓ Preparation of SSP, ISM Documentation and SOPEP Plans
- ✓ Preparation of various statutory documents for vessels
- ✓ Major Repair analysis & supervision
- ✓ Dry-dock repair supervision
- ✓ Lay-up ship maintenance and reactivation
- ✓ Vessel upgrades and conversions
- ✓ Tank coating, Specification development
- ✓ Casualty Inspection/Personal Injury Investigation
- ✓ Preparation of mooring analysis
- ✓ Preparation of mooring/unmooring procedure for 8 point and 4 point mooring

Certificate and Compliance

- ✓ ISM Code
- ✓ ISPS Code
- ✓ SOLAS
- ✓ MARPOL
- ✓ STCW
- ✓ IMDG
- ✓ ISPS
- ✓ IMCA
- ✓ MLC

Ship Management Core Competence

- ✓ Towing Tugs
- ✓ AHT
- ✓ AHTSV (DP I/II)
- ✓ DP (Dynamic Positioning Vessels)
- ✓ PSV/ SSV/ MPSV
- ✓ Sub Sea Construction Barges

Accommodation / Work/ Barge Pipe Laying/ Hook – up etc.)

- ✓ DSV
- ✓ Seismic/Research/Seismic Support
- ✓ LPG Vessel / Tankers
- ✓ Bulk Carriers

Crew Management and Manpower Solutions

- ✓ Offshore staff assessment and recruitment
- ✓ Offshore staff mobilization
- ✓ A – Z vessel staff hire and management
- ✓ Staff rotation planning
- ✓ Supply of Personal Protective Equipment (PPE) for Offshore Staff
- ✓ Crew insurance cover and claims handling

Fluid Sampling and Verification

We work with **Bureau Veritas** to provide independent certified sampling and analysis for all marine fuels.

Marine Fluid analysis are conducted at an independent certified laboratory.

Lestine Maritime's fluid analysis and verification offers clients the ability to determine with integrity the chemical composition and physical properties of the applicable marine fluid.

Lestine Maritime's Marine Fuel verification helps ensure that Marine fluid quality is maintained thus leading to reduced risk of break down of vessel due to bad fuels.

For Bunker Applications, the certified fluid analysis confirms that the actual Bunker Fuel reflects Fuel Quality claims by the Fuel Supplier

Fluid Sampling and Verification

- ✓ Under our fluid analysis capability, we offer analytical testing services including laboratory outsourcing, individual submitted sample analysis, routine quality control, trouble-shooting, contamination identification, simulated distillations, trace analysis, chromatography and much more.

We offer fluid sampling for the following Marine Fuel Scope;

- ✓ Marine Fuel and Sampling
- ✓ Diesel Fuel Testing and Sampling
- ✓ Motor Fuel Testing and Sampling
- ✓ Automotive Gas Oil Testing and Sampling

Maritime Training Services

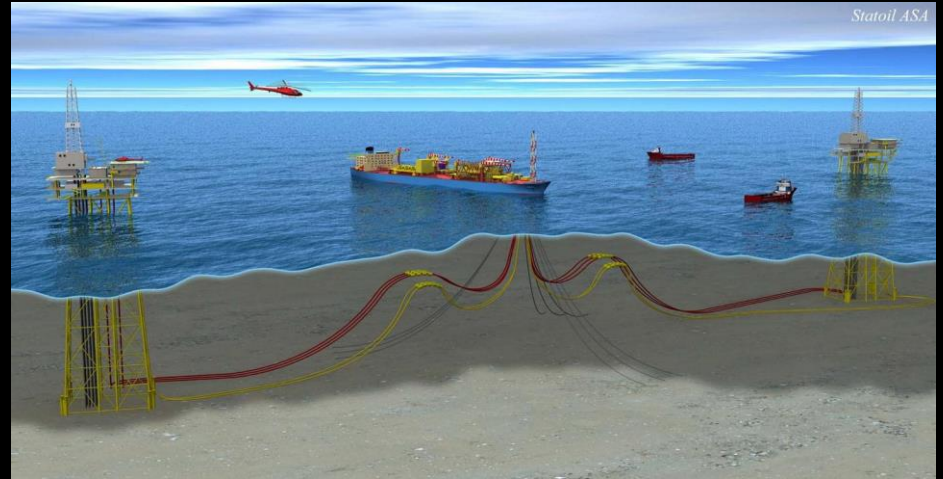

- ✓ We offer training services for basic vessel maintenance for newly hired staff members prior to deployment offshore
- ✓ We also provide Marine Awareness Courses and offer the following modules
 - Introduction to Marine Safety Equipment
 - Marine Risk Assessment
 - Effective Marine Communication principles
 - Key Vessel Equipment and Functionality

**In addition to Training Modules listed above, we offer bespoke Maritime Training tailored to meet specific Client's needs*

Subsea Training Services

- ✓ We offer Subsea Training Services to our clients. Modules offered are as follows
 - Introduction to Subsea Oil Production
 - Introduction to Subsea Equipment including;
 - Subsea Trees
 - Subsea Manifolds
 - Subsea Flow Lines and Jumpers
 - Subsea & Topside Control Systems

Ship Procurement & Project Management

We provide Ship Procurement Services on behalf of our clients.

We also offer full Project Management for Ship Build projects.

For Lestine Maritime, on-time delivery in accordance with client needs cannot be compromised therefore we ensure that projects are delivered in a timely manner

Our Procurement Expertise Includes

- Offshore Support Vessels
- Production Support Vessels
- Barges
- Offshore Tankers

**We will ensure that all Ship Construction under our supervision and management are in line with technical and delivery milestones agreed between the Client and the Ship Construction Contractor*

Vessel Survey, Inspection & Audits

Lestine Maritime carries out extensive range of surveys, inspections and audits on behalf of Ship Owners. With our global presence strategically located to service various geographical regions, we are able to carry out audits and surveys of Ships in a timely manner at any given Ship location.

We carry out these inspections on behalf of

- Ship Buyers and Charterers
- Banks and Financial Houses
- Insurance Companies

Lestine Maritime offers Vessel Surveys, Inspection & Audits in accordance With;

- Offshore Energy Industry using Common Marine Inspection Document
- All Surveys, Inspection and Audits are carried out by Accredited Inspectors

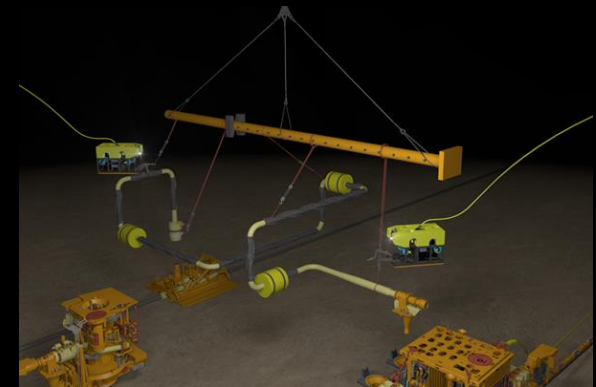

Subsea Survey and Inspection

Lestine Maritime offers Surveys and Inspections for Subsea Installations.

Subsea Survey and Inspection Scope includes;

- Installation and removal of structures
- Installation, and retrieval of Subsea Jumpers
- Remote Intervention Activities (valve operations, etc)
- Installation and Removal of Subsea Control Pods
- Pipe lay Support and Inspection
- Subsea Pipeline and Equipment Inspection
- Tie-in Completions and Assistance
- General Subsea Survey for Field Equipment
- Subsea Equipment appraisal including Leakage Identification

Remote Operated Vehicle Operations

We offer a wide range of ROVs and tooling to support offshore Drilling and Production activities.

Our ROVs are typically equipped with video cameras and position sensors for real time tracking of activities from the Vessel.

Our ROVs Services offers the following to our Clients

- Oil Exploration and Drilling Support
- Pipeline Surveys & Inspection of Subsea Structures
- Real Time visualisation of Subsea Activities
- Intervention Rehearsal Tooling
- ROV Pilot Training
- Remote Manual Valve operations

Diver Manpower Supply, Intervention and Management

We offer Diver Services to the Marine Industry.

Diver Operations offered by Lestine Maritime includes;

- Subsea Manual Valve Operations for water depth of below 100m
- Subsea Trenching
- Shallow Water Equipment Installation
- Corrosion Inspection
- Underwater Equipment Inspection and Appraisal

Supply of Offshore Support Vessels and Offshore Tankers

We offer Offshore Transport Services to the Oil and Gas Industry.

Our Vessel Fleets can support the following activities

- Offshore Platform Supplies
- Anchor Handling, Towing and Supply
- Supply of Pipe Laying & Transport Barges
- Offshore Personnel Transportation
- Boats
- Accommodation Vessels
- Tankers for Marine Fuel Transportation

Safety Equipment Services and Repairs

In partnership with NCGB India which is an ISO 9001 certified company with over 30 years of experience in safety systems, we offer servicing of safety and firefighting equipment to the Offshore Marine Industry.

We are authorized service engineers by many manufacturers for Life rafts and other lifesaving and firefighting equipment. These services are offered at Client's request.

Areas of Specialization:

- Life raft service station
- Service of Immersion suits
- Emergency Escape breathing device
- Firefighting Equipment service & testing
- Servicing of Navigational equipment
- Lifting appliances certification & servicing
- lifting appliance testing such as loose gear, cranes, hoist derricks, etc., NDT training and testing.
